

PALLET STRAPPING MACHINE

WE PACK PROMISES www.joinpack.com

Advanced Fully Automatic High Speed Servo Drive Pallet Strapping Machine

Model No: ZXCEL

High speed horizontal strapping system, Arch is flexible to start from top or bottom for next pallet load.
Two dispensers provide the highest efficiency to change over strap coil.

Feature

- Servo motor driving system.
- Strapping speed up to 8 straps per min.
- Top-down or bottom-up strapping pattern.
- Siemens PLC.
- 10" HMI touch screen.
- Pre-programmed for various strapping pattern.
- Auto self-loading device & looping ejector.
- Index sealing head with 200 mm stroke.
- Strap guiding system & safety device.
- Two dispensers, easy to change over.
- Hinged mast easy for installation & transportation.
- For PP&PET strapping.

Strap self-loading device, Dual dispensers

TOP DOWN BOTTOM UP

Fully Automatic Horizontal Pallet Strapping Machine

Model No: A-72HE

Horizontal strapping system works with PP and PET strapping.
It equipped with reliable sealing head that provide max 75 kgs tension.

Feature

- Commercial PLC control.
- Index sealing head with 250 mm stroke.
- Horizontal strapping on various height.
- Arch safety device.
- For PP & PET strapping.

Option

- HMI touch screen.
- Strap guiding system.
- Hinged mast.

Sensor for height detect

Fully Automatic Vertical Pallet Strapping Machine

Model No: A-72AO

Vertical strapping system fasten pallet load by PP or PET strapping.
Index sealing head and movable track that design for pallet strapping.

Feature

- Commercial PLC control.
- Index sealing head with 250 mm stroke.
- Vertical strapping with movable track.
- Short feeding system.
- Handshake interlock.
- Empty strap sensor.
- Stack light.
- For both PP & PET strapping.

Option

- Turntable for cross strapping.
- Top press platen.
- HMI touch screen.

Fully Automatic Vertical Pallet Strapping Machine

Model No: A-72YV

Vertical strapping system equipped with index sealing head for pallet strapping.
This system's arch is fixed (without movable track) that strap the pallet from bottom.

Feature

- PLC control.
- Index sealing head with 250 mm stroke.
- Vertical strapping with fixed track.
- Handshake interlock.
- Short feeding system.
- Low or empty strap sensor.
- Stack light.
- For both PP & PET strapping.

Option

- Turntable for cross strapping.
- Top press platen.

Fully Automatic Top Sealed Vertical PET Pallet Strapping Machine

Model No: A-8U

High sealing tension up to 200kgs, top sealed, vertical strapping with PET strap.
Applied on heavy duty or low pallet load strapping, such as construction industry.

Feature

- Top sealed strapping head.
- Commercial PLC control.
- Vertical strapping with movable track.
- Strapping done on any high position.
- Low or empty strap sensor.
- Stack light.
- For heavy duty PET strapping.
- Min. height of pallet load: 300mm.

Option

- Turntable for cross strapping.
- HMI touch screen.
- Regular sealing tension 70kgs, PP strap (A-72UA).
